**Quick Start  
Guide Inside!**

# Quick Start Guide

## 1 GETTING STARTED

Connect the charging cable to a user supplied \*\*USB charger. Plug the charger into the wall outlet, then connect the other end of the charging cable to the unit and charge for approximately 5 hours.

**Ensure contacts on BOTH the cable and the unit are clean and dry before connecting the charging cable to the unit.**

Remove the reservoir and fill with water. Replace reservoir and press down firmly.

Insert tip into the Water Flosser handle, pressing down firmly until it clicks into place.

\*\*USB charger requirements: USB Type-A, Rated Output: 5.0 VDC, 1.0 A.

## 2 PRIMING UNIT (FIRST TIME USE ONLY)

Set pressure control on base to high (pressure setting No.10), point the handle and tip into sink. Turn power and water ON until water flows from the tip. Turn both power and water OFF.

## 3 ADJUSTING THE PRESSURE SETTING

Turn the pressure control on the base of the unit to the lowest setting (pressure setting No.1) for first-time use. Gradually increase pressure over time to the setting you prefer – or as instructed by your dental professional.

## 4 USING THE WATER FLOSSER

With unit OFF, place tip in mouth. Start on LOW pressure. Turn power ON and water ON. Adjust pressure to your liking.

Lean over sink. Close lips enough to prevent splashing.

**TIP: TO AVOID MESS KEEP TIP IN MOUTH WHILE UNIT IS ON.**

5 Aim water at the gumline at a 90 degree angle. Follow the gumline and pause briefly between teeth.
