F3050 Mechanical Keyboard
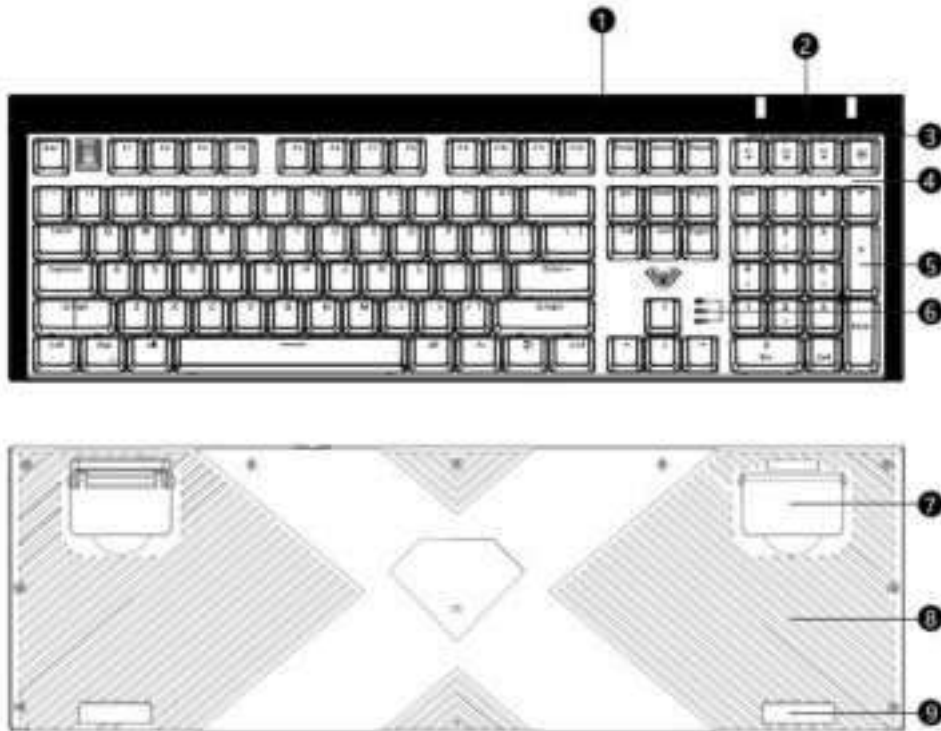

❶ Charging interface	❹ Metal panel	❼ Antiskid foot brace
❷ Roller	❺ Two-color keycaps	❽ Bottom shell
❸ Mode switch key	❻ Indicator light	❾ Antiskid foot pad

Product Specifications

- Product size: 453.07 (L) × 143.89 (W) × 38.61 (H) ± 0.2mm
- Product weight: about 880g
- Keys and switches: 104 keys,
- Gram weight: 60 ± 10g
- Total stroke of key: 4.0 mm
- Working voltage: DC 3.7V (wireless) / 5V ± 5% (Wired)
- Working current ≤ 120mA
- Operating system: windows all, Win XP, win7, win8, win10
    (in Win95 and Win98 systems, drivers may be required).

Product description

- Fashionable appearance edge design, integrated metal panel, not easy to rust, scratch resistant.
- The key cap adopts two-color injection molding process, which is durable, not easy to fade, and can be multi-color.
- The key response is sensitive, and the trigger stroke is 2.0 mm.
- About 60 million keystrokes life, durable, excellent feel.
- Support N key without impact.
- Gap light, uniform color, optional single color or mixed light.
- Humanized keyboard design, with FN to add a series of commonly used shortcut function keys.
- Switchable 3 modes: game mode, office mode and picture mode, which can be switched according to personal needs.
- Independent multi-function roller, rolling up or down in three modes has different functions.
- Wired and 2.4G dual-mode function, both modes can cooperate with the driver, can be customized and macro programming. The driver configuration function can be used in wireless mode or wired mode. The 128K bits memory can save 5 driver configuration files to the keyboard.
- Wired Type-C / 2.4G mode conversion: plug in the USB cable to enter the wired mode, pull out the Type-C cable to turn to the wireless mode, and the 2.4G wireless mode needs to be used with the receiver.
- Receiver and keyboard plug and play, press "ESC" and "Q" at the same time to re code. Num, cap and win flash at the same time, and then plug in the receiver, and the light stops flashing after successful code matching.
- With low voltage alarm, shared with num, Num indicator flashes to remind low voltage, need to charge in time. The backlight is off at low pressure.
- Three independent indicators: num (shared with low voltage indicator), cap, win indicator.
- Support charging and indicating function. When charging, the red light under F12 button will be on, and the red light will be off after full charge.
- Automatic sleep function, unplug the receiver, keyboard quickly enter deep sleep, save more power. In wireless mode, the light will turn off automatically and the key will wake up after about 60 seconds.
- Built in 2000mAh large capacity lithium battery, recyclable charging, with power switch, environmental protection and energy saving, worry and money saving, effectively extend the battery life.

Shortcut key description

| Fn+	F1	F2	F3	F4	F5	F6	F7
Quick Function	My computer	Search	Calculator	Player	Last song	Next song	Play / pause
