PANEL DESCRIPTION

"ON/OFF " Button: Turn ON/Turn OFF;
"Boil" Button: Boil Water as Electrical Kettle;
"Night Light" Button: Turn on or off the night light on both sides of the Knob;
"Keep Warm" Button: Keep warm all day and night until water dry out;
"Knob": Adjust the temperature you need .

Note:
Due to differences in regional atmospheric pressure, the boiling point may be lower or higher than 100°C(212°F).

OPERATION

Make sure cleanliness of this instant warmer before use.
Please Sterilize the warmer before use at the first time: Boil the water and pour it out.
Do not add water beyond the maximum level to prevent scalding.
It is highly recommended to use purified or distilled water to prevent scales.
When plug in the power, you will hear "Beep" sounds and there is no display on the screen.

5

OPERATION

- ON/OFF:** Touch the ON/OFF button, light will be on and the display shows the current temperature and the set temperature (default temperature is 45°C/113 °F).
- Keep Warm:** Touch the "Keep Warm" button, light will be on and the appliance will keep water warm at certain temperature. Adjust the temperature by turning knob. Adjustable range is 35-96°C (95-204.8°F).
If the screen is too bright for you, press for 3 seconds to enter the off-screen mode. Only the indicator light of the "Keep Warm" button is on in this mode.
- Night light:** Turn on or off the night light on both sides of the Knob.
- Boil:** Touch the "boil" button, light will be on and the instant warmer will boil water. After the water is boiled, light goes off and the product automatically enters the "Keep Warm" mode. You can set the keep warm temperature by turning knob.

During the working process, if you press the "ON/OFF" button, it will stop working.

For above functions, if you press the "ON/OFF" button during the working process, it will stop working and enter the standby mode.

CLEANING

- Please unplug the power and wait for it to cool down before cleaning.
- Never immerse this product and just wipe it with a rag.

6

DESCALING

It is recommended to descale the bottle warmer every four weeks to ensure it continues to work efficiently.

- Mix 10g citric acid cleaner with 200ml/7oz of cold water to descale the instant warmer. Turn on the instant warmer, select the "Boil" function then wait for 2-3 minutes after boiling, the descaling is completed.
- Mix 50ml/1.7 oz of white vinegar with 100ml/3.5oz of cold water to descale the instant warmer. Switch on the instant warmer, select the "Boil" function then wait for 10 minutes after boiling. Leave the solution in the instant warmer until all scale has dissolved.

NOTE:
1) Never dry out.
2) Do not use other types of descalers.

If you still see traces of scale after rinsing, repeat the descaling procedure.
