OVERVIEW

- 1 + button
- 2 Power button
- 3 - button
- 4 microSD card slot
- 5 USB charging port
- 6 Mode button
- 7 Indicator

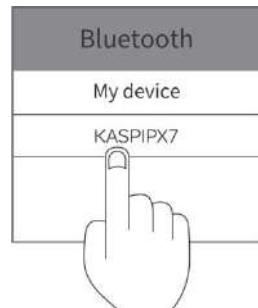

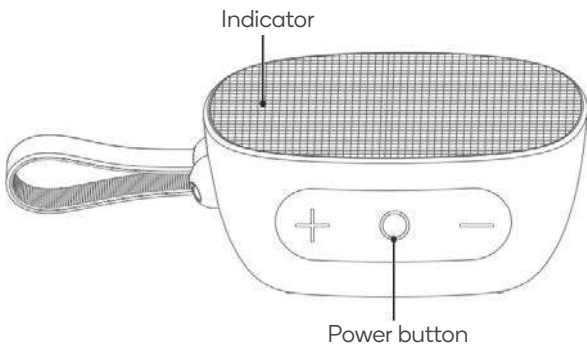

OPERATION

Charging the Speaker

- Plug the supplied USB cable into the charging port on the speaker.
- Connect the cable to a USB power adapter (mobile phone charger) and connect it to a power outlet.
- The speaker will be fully charged in approximately 2-3 hours.

Pairing with Bluetooth Device

- Press and hold the power button for 2 seconds. The speaker will play a tone and the indicator will begin to rapidly flash. The speaker is now in pairing mode.
- Activate Bluetooth on your phone or other Bluetooth enabled device.
- Select “KASPIPX7” from the list found devices.
- The indicator will turn solid blue once pairing has been successful.

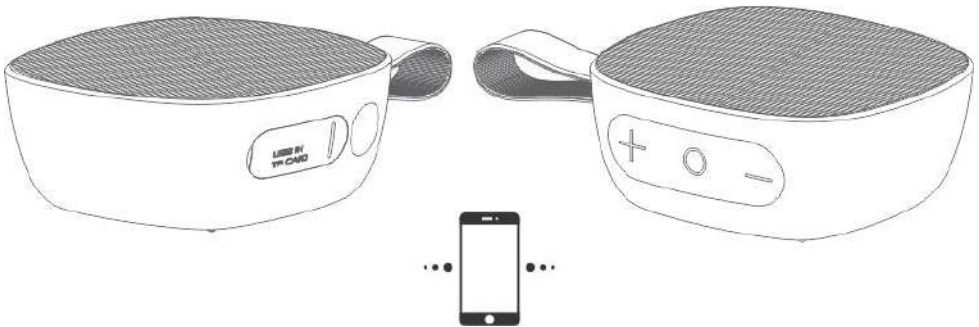

TWS Mode

This speaker can be linked to a second speaker (sold separately) to function in TWS “True Wireless Stereo” mode. To activate TWS mode:

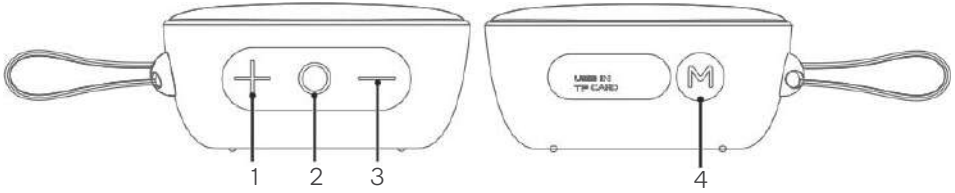

1. Turn on both speakers and ensure the blue indicators are flashing.
2. Press both the “+” and “-” buttons simultaneous on one of the speakers. The speaker will play an audio tone and enter into TWS pairing mode.
3. After 1-2 seconds, the two speakers will automatically pair together. The speakers will both play an audio tone if they have been successfully paired together.
4. The primary speaker will have a solid blue indicator, while the secondary speaker’s indicator will continue to flash.
5. Open the Bluetooth settings on your device and select "KASPIPX7" from the list of found devices.
6. Your device is now paired to both speakers.
7. To disable TWS mode, press both the “+” and “-” buttons simultaneous on one of the speakers.

Note:

For TWS mode, the two speakers will need to be linked together before connecting to your Bluetooth device.

FAQ

Q: What kind of charger should I use for the speaker?

A: All common USB chargers can be used, we recommend using 5V/2A or above 2A.

Q: Why is there audio interference or discontinuous sound during playback?

A: The speaker has a range of 10m without obstructions. If it is used outside of a 10m range or if there are obstructions between the speaker and the device, you may experience audio interference or discontinuous sound.

Q: Why is the speaker turning off automatically?

A: When there is no Bluetooth connection or the device is out of range for more than 10 minutes, the speaker will automatically turn off to conserve power.

Q: Why isn't the speaker connecting to the paired device?

A: Delete the speaker from the device and repeat the pairing process.

Q: The speaker will not turn on?

A: Connect the speaker to a USB power adapter and try again in a few minutes.

A: Reset the speaker by pressing and holding the power button for 10-30 seconds.
