8GB USB Digital Silicone Watch
KAWTC8GBLKA
Quick Start Guide

Functions

This multi-functional watch contains a fully integrated USB drive, allowing the watch-face to display the available disk capacity in addition to the current time. For ultra-convenience, the built-in rechargeable lithium-polymer battery encased within the durable body will ensure you will enjoy your watch for many years to come.

Product Features

- Fashionable watch design, allowing you to discretely carry your data
- Generous, comfortable strap
- Large 8GB capacity
- High speed USB 2.0 port
- Built-in durable lithium battery that can be charged via USB

Function Key

1. Press the function key to display the time, then four seconds later it will display the date, finally followed by the current ambient temperature.
2. Hold the function key down for 3 seconds to display the total USB disk capacity for one second, followed by the remaining USB disk capacity, finally followed by the current battery residual power.
3. Plug the USB into the computer.   The LED will show a circular animation when data is being transferred.   When no data is being transferred, the screen will show a battery filling style animation and display the battery power level.

Adjusting Clock Time

The time can be adjusted via two methods. One through the button to adjust the time, otherwise it can be synchronized via the computer.

Method 1: Using the button to adjust the clock
1. Press the function button, then when the time is displaying on the screen, hold the function button down for 3 seconds. The watch will now be in time adjustment mode.
2. Press the function button to adjust the current number up. When the number is correct, hold the function button down for 3 seconds to move to the next numeral in the time.
3. The adjustments will be made in the order of Hour → Minutes → Month → Date.
4. If you enter an incorrect number, you will need to go back to step 1.

Method 2: Using the computer to adjust the clock
1. Plug the USB into your computer.
2. Open the text file (clock.txt or time.txt) in notepad or other similar application. Put the current time and date into that document.
3. Unplug the USB, at which point the watch will be synchronized to the time entered.

TXT file requirements: Year / Month / Day / Hour / minutes / seconds
(Example: 2014-07-28 18:03:30)
