

The **RØDE** BoomPole is designed to complement the extensive range of **RØDE** Video, Broadcast and Electronic News Gathering (ENG) microphones and accessories.

Made from lightweight high-strength black anodized Aluminium, the BoomPole's telescopic sections allow infinite adjustment from 0.84m (33") to 3.28m (10' 9 1/8") on the standard BoomPole or 0.84m (33") to 2.05m (81") on the Mini BoomPole. The quick release friction rings enable fast and secure adjustment of the individual tubes for precise positioning and application flexibility.

To enhance user grip and aid mobility the bottom section of the BoomPole is covered with an expanded foam rubber tube that can be easily removed or replaced. The BoomPole comes supplied with an industry standard 3/8" x 16 tpi threaded insert allowing a wide selection of accessories to be securely attached. When used in conjunction with the **RØDE** 5/8" to 3/8" thread adaptor the full range of **RØDE** accessories can be interchanged at will.

Designed in Australia, the BoomPole is the perfect addition to complement the flexibility and utility of **RØDE**'s extensive range of Video and Broadcast microphones.

Features

- Telescopic construction, reduces to 0.84 meters in length for storage and transport.
- Quickly extends to: Standard >3.2 metres (10' 9 1/8")
Mini > 2.05 metres (6' 9")
- Lightweight and ergonomically balanced for easy handling during mobile recording.
