Jabra A320s Software upgrade - a step-by-step guide

Main features

- Answer and end Skype calls from your Jabra Bluetooth Headset
- Faster Bluetooth updates
- Improved profile management when using Handsfree and A2DP profile
- General Software improvements

The software update can only be used if you already have Jabra Bluetooth Adapter A320s software installed

Your paired devices and other settings made in your Bluetooth software may be removed during the software installation process

Do not remove your Jabra Bluetooth Adapter A320s during the installation process

STEP-BY-STEP

We recommend you download and print these instructions for handy reference

STEP 1

• Ensure that the Jabra Bluetooth Adapter A320s is connected to your PC. Disable all active Bluetooth connections.

STEP 2

• To update your software unzip the attached software, then save to your Desktop.

STEP 3

· Click on Run to initiate the software upgrade.

STEP 4

Click Run to upgrade your software
